

**PRESS RELEASE**

**IPCM'S 2025 PRODUCTION PERFORMANCE STRENGTHENS, READY TO ACCELERATE IN 2026**

**Jakarta, January 29, 2026** – PT Jasa Armada Indonesia Tbk (IDX: IPCM), part of the Pelindo Group operating in the pilotage and tugboat services sector, has once again recorded positive production performance in tugboat and pilotage services through the end of December 2025, in line with increased port activities, service optimization across various operational areas, and IPCM's strategic role in supporting the smooth operation of national logistics.

Through December 2025, IPCM's total tugboat production reached 1.85 million GT Hours, growing 6.67% compared to the previous year's realization. This growth was supported by increased services in the general segment, Private Use Terminals (TUKS), and Special Terminals (TERSUS), in line with increased commercial vessel, energy, and container activities at various major ports.

Pilotage performance also demonstrated solid growth trends, with total production reaching 747.99 million GT through December 2025, representing a significant increase of 70.17% compared to the previous year's realization. Vessel movements also experienced an increase of 165.78% compared to the previous year's realization, reaching 101,544 vessel movements. This increase reflects the high level of vessel movement activity and service users' trust in the reliability of IPCM's pilotage services in its operational areas.

Regionally, production growth was supported by strong contributions from several strategic areas. This increase was driven by expanded cargo services, strengthened commodity export activities, energy and LNG services, as well as increased nickel commodity transshipment in eastern Indonesia.

President Director of PT Jasa Armada Indonesia Tbk, Shanti Puruhita, stated that the performance achievements through the end of 2025 have become a strong foundation for IPCM in entering 2026. "The growth in tugboat and pilotage production through December 2025 reflects IPCM's consistency in maintaining service reliability, maritime safety, and operational efficiency. This achievement serves as important capital for us to move more progressively in 2026," she said.

Entering 2026, IPCM will focus its strategic initiatives on strengthening operational reliability, increasing service productivity, and developing sustainable business practices. The Company will also continue to strengthen synergy with stakeholders, optimize fleet utilization, and enhance human resource competencies to support the growth of national port and logistics services.

With continuously growing performance and measured strategic direction, IPCM is optimistic about further strengthening its position as a professional, reliable, and competitive pilotage and tugboat service provider, while delivering sustainable added value to stakeholders.
